VITAL THERAPEUTICS

Contract Pharmaceutical Services

Major Markets:

WE OFFER UNIQUE PARTNERSHIPS to virtual, small and big pharmaceutical companies for Human Pharmaceuticals, Veterinary Pharmaceuticals and Vitamin Supplements. We are a preferred partner in Contract Manufacturing for Global MNC's in Domestic Market.

Services Offered

We are experienced in formulation development, small scale, commercial manufacturing, labelling and packaging, technology transfer and process validation. Moreover, our manufacturing services include expertise in oral solid dosage forms and liquid orals. These services are accordance with the most recent guidelines for cGMP and WHO environments.

Manufacturing Capacities:

Oral Liquids - We have 5000 KL manufacturing facility with a production capacity of 1 lac bottles per day

Powders - We have a powder facility with a Batch size of 250 Kg to 2000 Kg and production capability of 600 MT / month

Tablets - Our tablet facility can produce 150 MIO tablets per month

Packaging:

Blister Packaging Lines
Strip Packaging Lines
Ink Jet Printing
Bottle Packing
High Speed Solid Dose Equipments
Powder Filling Lines
Secondary and Tertiary Packaging Lines
Speciality Liquid Lines
Speciality Packaging for Kit/Sample Assembly

Services in Support of Manufacturing:

Raw Material Testing
Finished Goods Testing
Formulation Development
Qualification of Alternative Raw Materials
Microbiological Testing
Validation Service
Analytical Method Development
Stability Services(ICH Guidelines)
Technical Transfer/Scale-up Expertise
Commercial Manufacturing of Finished Dosage forms

VITAL THERAPEUTICS

Manufacturing facilities

Regulatory Standards

cGMP
Safety Health and Environment (SHE) policy
Food and Drug Administration (FDA)
Cross contamination control
Analysis of all Finished Products
Ethical Code of Conduct
Hazard Analysis of Critical Control Points (HACCP)
Supplier approval process
Performance Qualification of all Equipments
Strict adherence to local and government regulations

Production and Supply

Zoning concept,
Wood, Jewel and Glass policy
Employee training on hygiene
Full traceability via lot and batch numbers
Clear rules for production sequencing
Pest control measures
Tracking delivery status
Providing certificates of analysis
Site audits for Customers

Certification

WHO/GMP
ISO 9001: 2008
ISO 22000

Quality

Validated methods
Trained and validated laboratory technicians
Calibrated laboratory equipment
Finished Goods released through QA Manager
Established audit plans internally
Stability Studies

Documentation

Full chemical in-house analysis
Microbiological in-house analysis
Level of contaminants

Regulatory documentation

- Allergens
- GMOs
- Pesticides
- Product Data Sheet

Responsibility

Valuable partnerships with Customers and Suppliers
Respect for Employee and people
Corporate and Social responsibility

Vital offers Vitamin Premix for Enrichment and Fortification of **Food Products**, **Neutraceuticals**, **Energy Drinks**, **Infant Foods** & **Breakfast Cereals** etc. We have expertise in designing & manufacturing premix as per customer requirements.

FOOD Safety Management System

ISO 22000: Food Safety Management Systems

Requirements for organisations throughout the food chain

We guarantee the nutritional value and safety of Vitamin & Mineral Premixes manufactured by us, as we follow modern Quality Management System

WHO/GMP Manufacturing

ISO 9001 - QMS

ISO 22000 - FSMS

Critical Advantage of Vital Premix

From formulation to application, Vital premixes offer numerous advantages to global feed manufacturers by packing all the nutrients you need in one nutrient system, We can help you...

? **Accelerate product development:** With our expert technical support and state-of-the-art facilities, **Vital** can quickly turn around new formulations by providing free samples during the development phase.

? **Reduce testing costs:** You save Time & Money because we meticulously test every premix for Label Claim and support it with Certificate of Analysis.

? **Reduce purchasing and inventory costs:** Because all the nutrients you need are in one premix, which can be shipped on demand, you reduce both purchasing and inventory costs.

? **Reduce labour costs:** Batch production is simplified with a single blend, incorporating multiple ingredients, which avoid dosage errors.

? **Increase output:** Faster production means increased output and eliminates downtime associated with recreating or reworking premixes "in-house."

? **Reduce equipment costs:** No need to purchase, operate or train staff to operate, ingredient blending equipment.

Critical Control Points In Premix Manufacturing (HACCP)

Vital takes care of all the critical operations in premix manufacturing process, which can impact the product quality and stability. All critical points such as Raw materials, Plant hygiene, Blending Equipment/Time/Certification Homogeneity, Quality Control, Packaging, Storage & Documentation are thoroughly inspected by us to deliver a perfect product.
